

The background features a light blue, stylized graphic of human figures in a line, with circular heads. The figures are composed of rounded rectangular shapes for the bodies and simple circles for the heads. The overall aesthetic is clean and modern.

iFlow

**Complete time and
attendance solution**

What is iFlow?

Get ready to be wowed by iFlow - the revolutionary HR management software that takes employee management to a whole new level. With cutting-edge modules and functionalities, iFlow streamlines your day-to-day HR tasks and provides real-time analytics and customizable reporting. Our user-friendly interface and tailored packages give your company the competitive edge it needs. Choose iFlow and elevate your HR management to new heights.

The collage features several key components of the iFlow HR management software:

- Employee Profile (Irene Adler):** Shows a profile card for Irene Adler, #ID 25256, with contact information: Email: ireeadler@gmail.com, Phone Number: 555235656.
- Calendar:** A central calendar grid with a red play button overlay, indicating a video or recording feature.
- Leave Request Form (Delilah Roberts):** A detailed form for a leave request. It includes fields for "Paid Leave" (1 Work Day), "Paid Leave Type" (Annual Leave), "Paid Leave for year" (2023), and "Interval" (10/03/2023 - 10/03/2023). It also shows the "Current Status" as "Awaiting approval" and a list of "Overlapping with" employees. A "Generate document" button and "Download" link for "Paid Leave Request.pdf" are visible.
- Timekeeping (Online Timekeeping - iFlow App):** A horizontal bar showing time tracking for a user, with a progress bar from 0:24 to 1:41.
- Teams List:** A list of team members including Daisy Montana (Programming), Emily Watson (Web Design), Irene Adler (Programming), James McCoy (Programming), Johnny Silverha (Programming), and Katy Stevens (Web Design).
- File Upload:** A "Draw" and "Type" section with an "Image" tab, showing a stamp and a signature. Below it is a "Drag & drop your files here" area with a "Choose file" button.
- Actions:** Buttons for "Edit", "Delete", "Approve", and "Deny" are present at the bottom of the leave request form.

Timekeeping methods in iFlow

The iFlow Time & HR app incorporates several digital time and attendance methods suitable for different types of employees in various industries.

**Various clocking
methods**

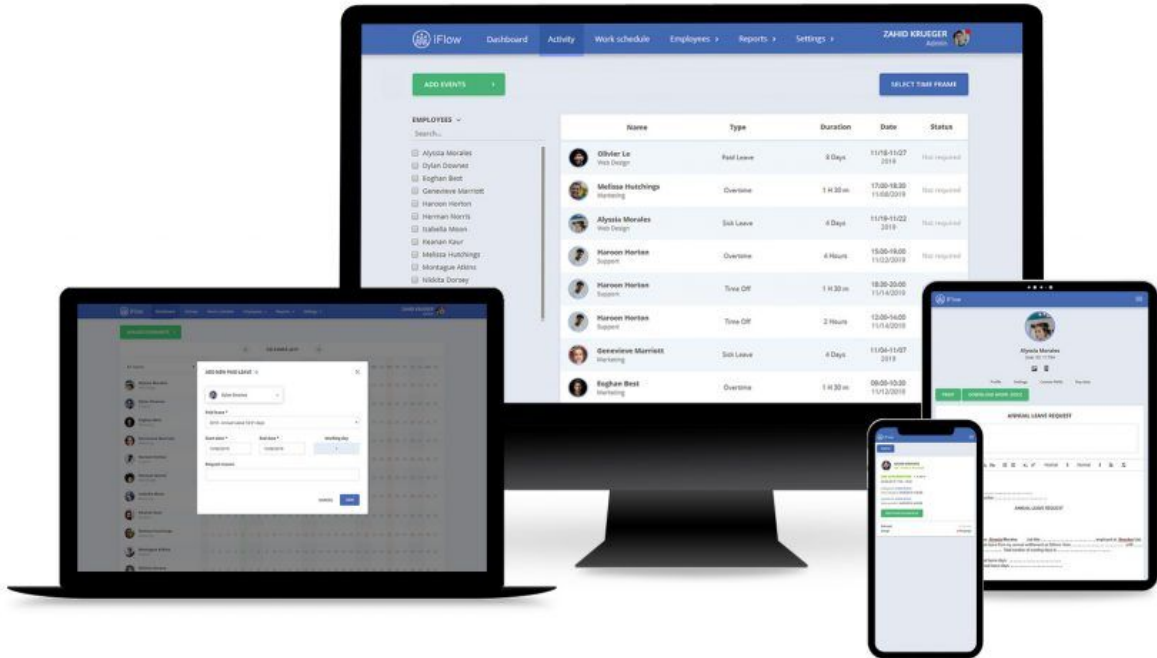

**Unlimited number
of employees**

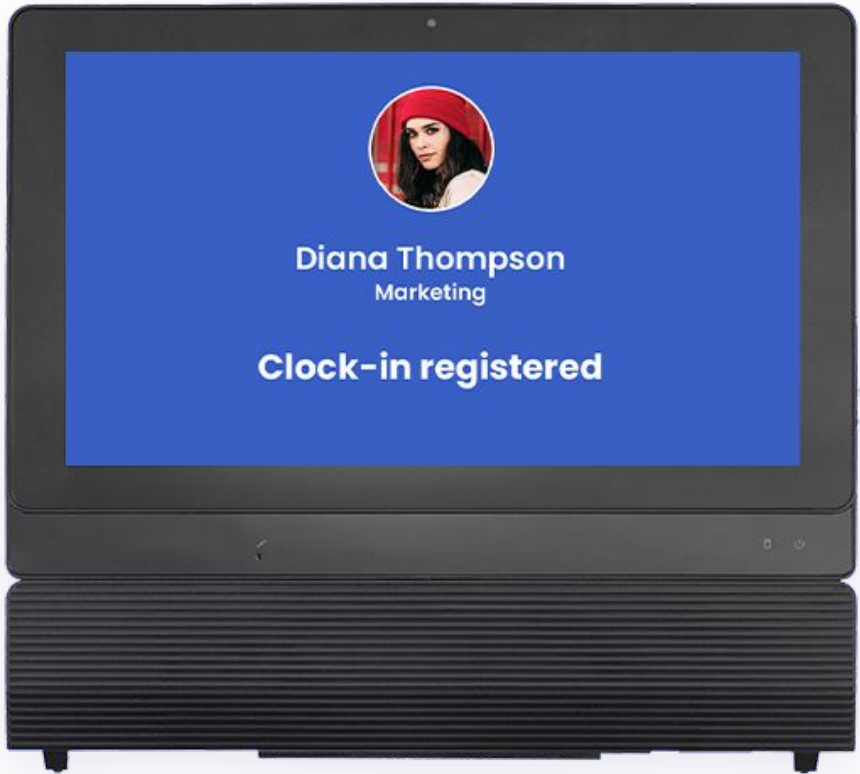

**Real-time
notifications**

Different clocking methods

Clocking in from mobile phone, PC, laptop, or directly from the app

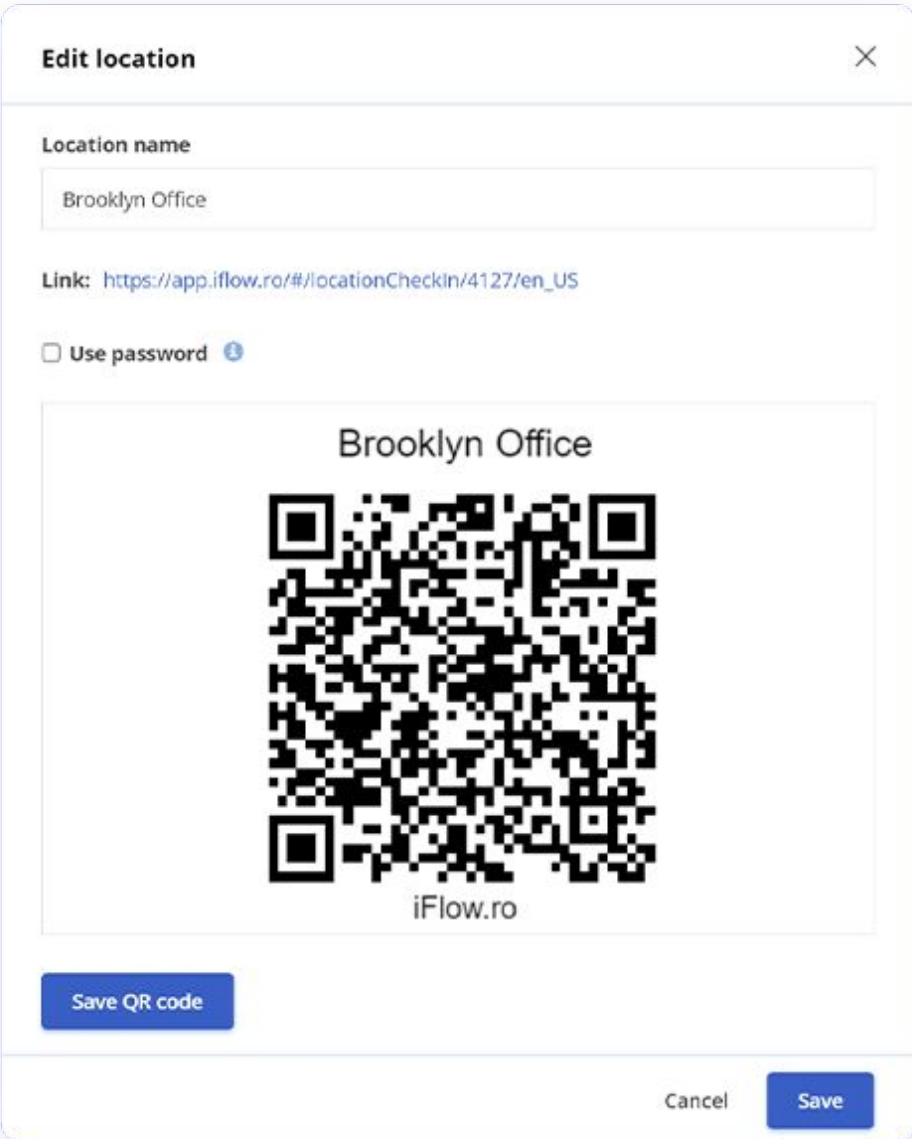

Clocking in with RFID cards from the iFlow industrial device

Clocking in from a Suprema access control device

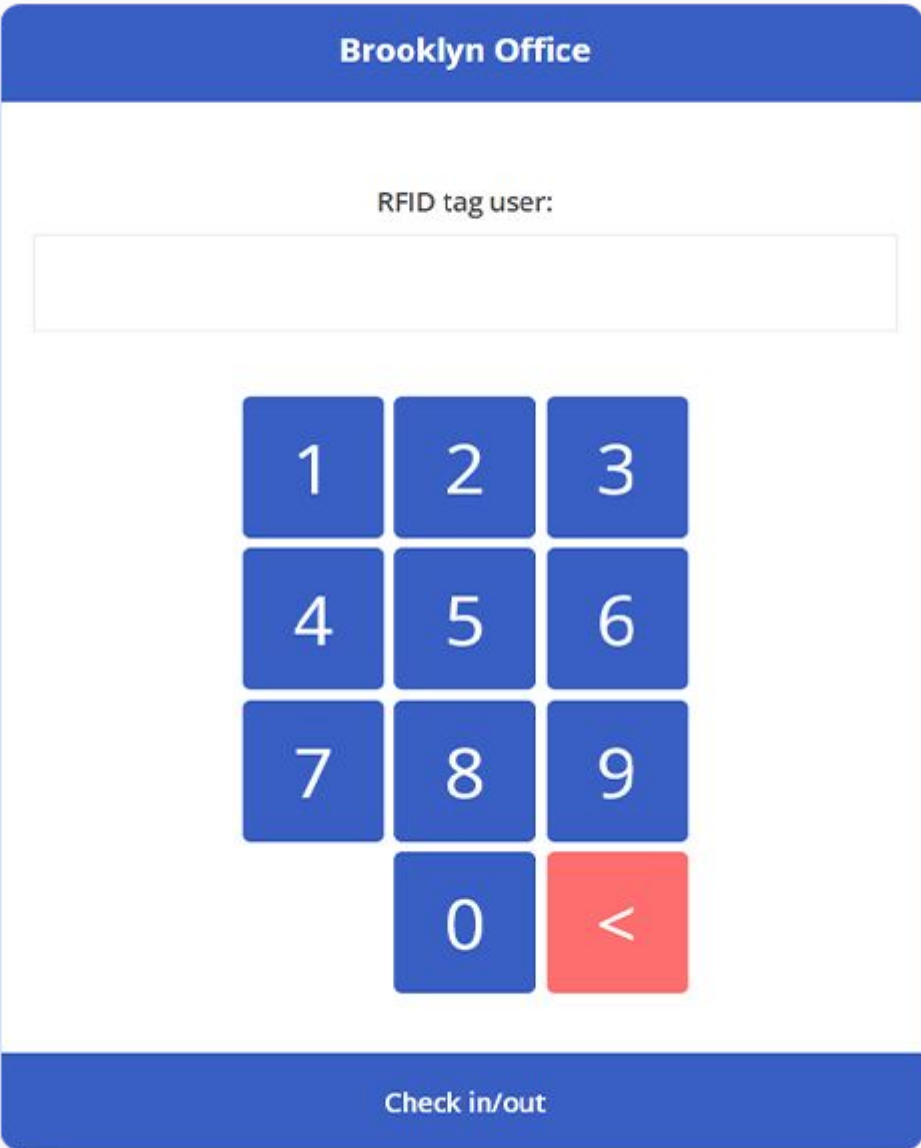

Facial recognition Fingerprint Bluetooth or NFC RFID card

Different clocking methods

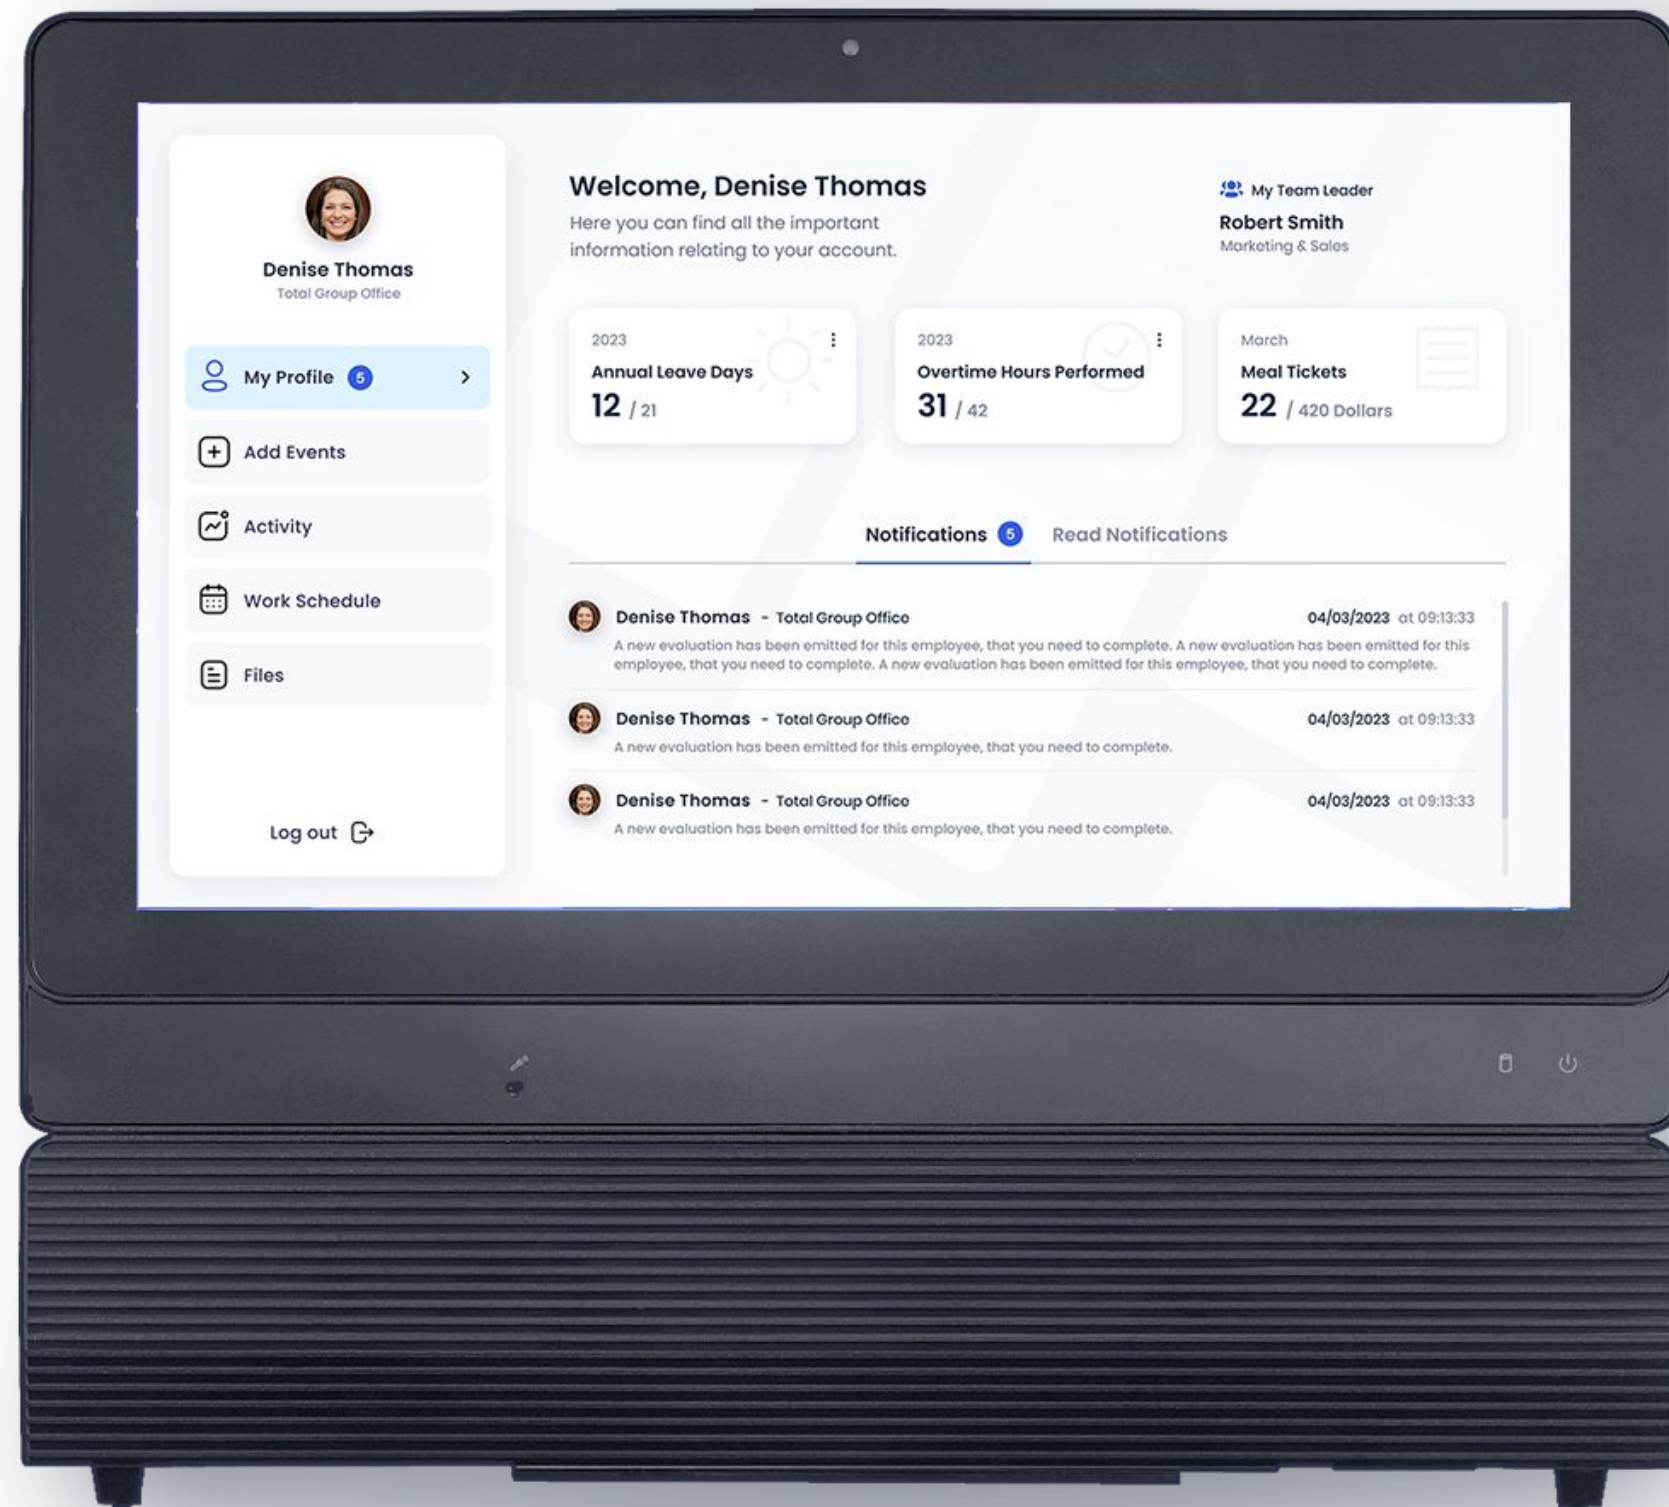

Clocking in with a link or QR code

Clocking in with a PIN code

Clocking in with the iFlow KIT office mini PC

iFlow Kiosk

Designed to support employees in their day-to-day experience with HR processes in the company, iFlow Kiosk offers the ability to perform the following activities:

- Receive notifications such as request approvals, work delays, and more
- Submit leave request and check if approved
- View planned work schedule and hours worked
- Check used and remaining leave days
- Find out who their team leader is

Data accuracy in iFlow

Employees clock in themselves, or the team leader records the attendance for the members of their team

The app retrieves GPS location to ensure that the employee is in the correct location

Photo capture of the employee from the clocking devices eliminates the risk of swapping cards between colleagues

The screenshot displays the iFlow work schedule planning interface. On the left, a 'Work Schedule' grid shows the weekly schedules for six employees: Daisy Montana (Programming, 8H Shift), Emily Watson (Web Design), Irene Adler (Programming, 8H Shift), James McCoy (Programming, 8H Shift), Johnny Silverhand (Programming), and Katy Stevens (Web Design). The grid uses colored bars to represent work days and breaks. On the right, an 'Edit schedule pattern' dialog box is open, allowing for the configuration of a new schedule model. The dialog includes fields for Name, Pattern type, Weekend, Company free days, and Visibility. Below these fields is a 'Pattern' table with columns for Day, Location, Work schedule, and Break. The table contains three entries for 'Stracker Ltd.' with work schedules of 08:00 - 17:00, 16:00 - 04:00, and 06:00 - 14:00, each with a corresponding break time. The dialog also features 'Add day', 'Cancel', and 'Save' buttons.

Day	Location	Work schedule	Break
1	Stracker Ltd.	08:00 - 17:00	12:00 - 13:00
2	Stracker Ltd.	16:00 - 04:00	
3	Stracker Ltd.	06:00 - 14:00	

Work schedule planning

In iFlow, you can plan each employee's work schedule individually, in teams, or at the organizational level.

Organized

You can create work program models and predefined shifts and allocate them to employees for the required period.

Efficient

Thus, each employee knows precisely when they should come to work, the duration of their break, which days are their days off, etc

✓ Structured data

With the quick panel in the work schedule settings, you get information about total planned hours, filtered by job, team, location, or shift. This gives you an efficient summary of your employees' working hours and makes it easy to intervene when a shift or location needs more employees.

Add calculation tab

Name: Calculation Schedule

Source tab: Work schedule

THEN

ELSE

Add group

Operations: Copy work schedule to the current calculation tab.

Add Save

✓ Automatic checks

Use checklists to edit incorrect employee records (missing clock-in/out times, unplanned clocking in/out, and more), ensuring accurate time reporting and avoiding manual checks.

iFlow events

The app has several predefined events that can be selected by employees or assigned by the team leader.

✓ Flexible

The events are customizable, so depending on the company's needs, the account administrator can modify or delete existing events and add new categories accordingly.

✓ Transparent

In addition, events are displayed in the attendance report, and the hours took off or worked overtime are automatically calculated.

Manage event types

You can create custom event types. Afterwards, users can use this new type to add events. Examples of such event types: on field, delegation, client work, training, etc.

[Find here step by step explanations.](#)

Add new event type

Employee self-service

The self-service function allows employees to request vacation, overtime or leave, and other events through the application or from the timekeeping device. Additionally, they can track this data from their iFlow account.

Superiors receive the information directly in the app and can decide the approval or rejection of the events in real time.

Perfect for various industries

Retail industry

Night or weekend hours are automatically calculated in the timesheet according to the applicable legislation.

IT

Work with flexible schedules is tracked down to the minute, and time tracking can be done directly from a mobile phone.

Construction

Attendance can be recorded directly on projects, and order progress can be monitored from different locations.

Hotels & Restaurants

Shift-based or part-time work. Accurate reports, regardless of your employees' schedules.

Wood processing

Cleaning Companies

Accounting

Plastics industry

iPM: Project Management

With iFlow, you can see projects across your organization clearly, track the progress of your teams, and make informed decisions.

✓ Informed

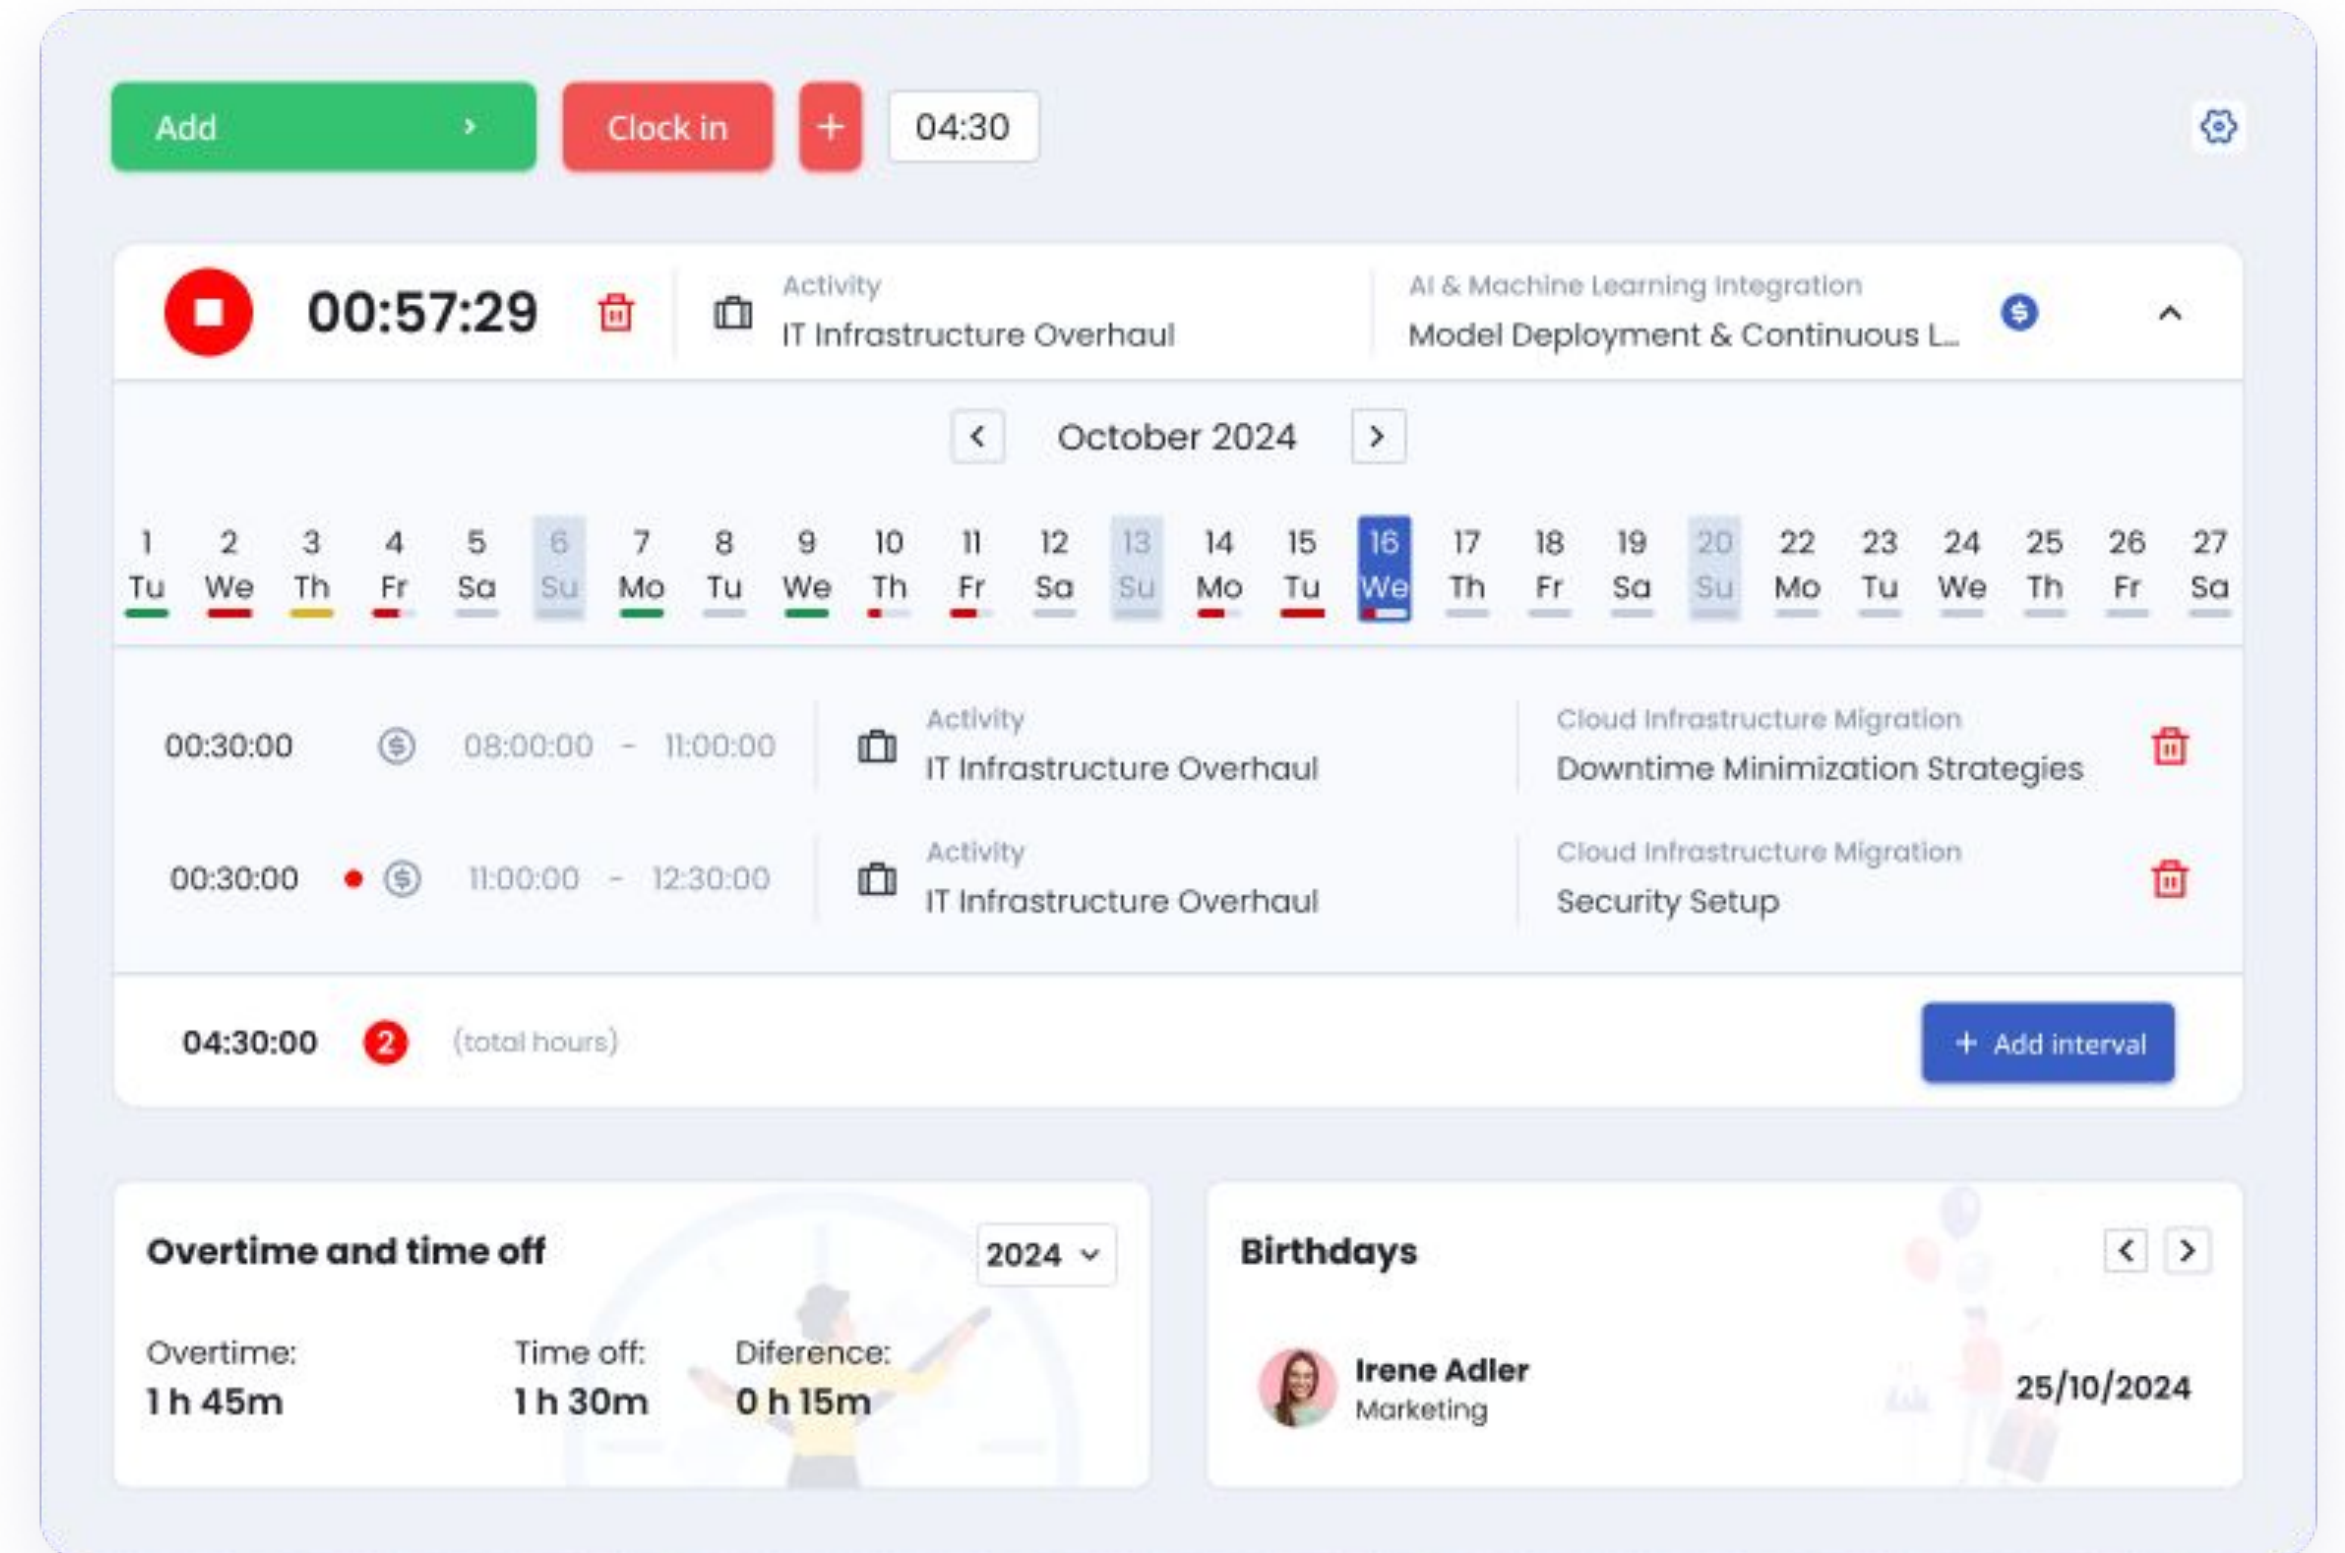

You can access the app from anywhere, on any device, and stay up to date with all the information you need with real-time progress reports.

✓ Easy

Employees can record and mark working hours as billable, encouraging a transparent relationship with customers and ensuring that employees are paid fairly.

✓ Organized

Activities are efficiently structured into projects, sections, and sub-projects for optimal management.

Record of worked hours

iFlow provides detailed reports on the hours your employees spend at work. Thanks to this functionality, you can be sure that the people in your company respect their work schedule and that all tasks are completed.

- With the location attendance report, you monitor attendance on every work point, quickly and easily**
- For employees with mobile work locations, you can check attendance with GPS location and timesheet photo**

1

The evaluations module in iFlow is the perfect tool to check your company's performance and knowledge level.

2

View reports based on the assessment session, individual responses, or the group of questions required.

3

Create customized review templates and collect responses anonymously, encouraging honest feedback.

Unlock Your Team's Potential with iPR

Rapidity

The time spent submitting evaluations is reduced by 85%, and employees receive notifications about surveys that will complete them.

Automated reports

All collected data is displayed in the form of easy-to-interpret graphs and reports.

Privacy

Employee responses are private. Only the team leader or administrator has access to the recorded information.

Custom templates

All existing templates can be modified or may be added new models depending on the organization's requirements.

iFlex: iFlow Hour Bank

The iFlow app is a helpful tool for managing the overtime worked by your employees, even when it's done during weekends, holidays, or in different shifts.

Furthermore, you can decide how to compensate for these extra hours by granting time off or through payment.

**Customizable
hour bank**

**Report set on

Benefits of iDocs

Communication between employees and management

The employee adds a leave request and sends it to the administrator to be signed, after which he can quickly determine if the document has been approved and signed in the personal profile.

Swiftly sending information

Communicate company policies directly to employees. Each user in the account is notified; thus, you will save time to inform the staff about the new regulations.

Legal compliance

Avoid situations where some requests or employee certificates are missing because all documents are kept in the iFlow digital archive, where you can easily download any document to any device with internet access.

iNotify: iFlow General Reminders

With iNotify, you successfully manage general reminders and all essential deadlines. Easily set reminders, add notes, and get notifications at the right time!

You can create reminders for any employee and subject, such as events, documents, signatures, or general reminders.

Record of activities in the company

In iFlow, you can generate automatic reports on different categories, such as:

Clocking

Food coupons

Annual paid leave

Events

Attendance

Activities

Evaluations

Employees

You have access to information anytime and anywhere

1

Timing software can be used on any smart device with access to the internet, and all data is updated to the minute.

2

You receive notifications about employee activities, identified errors, and other account actions.

3

Find out quick and precise answers to all questions related to employees, holidays, work schedules, etc.

Cloud based SAAS

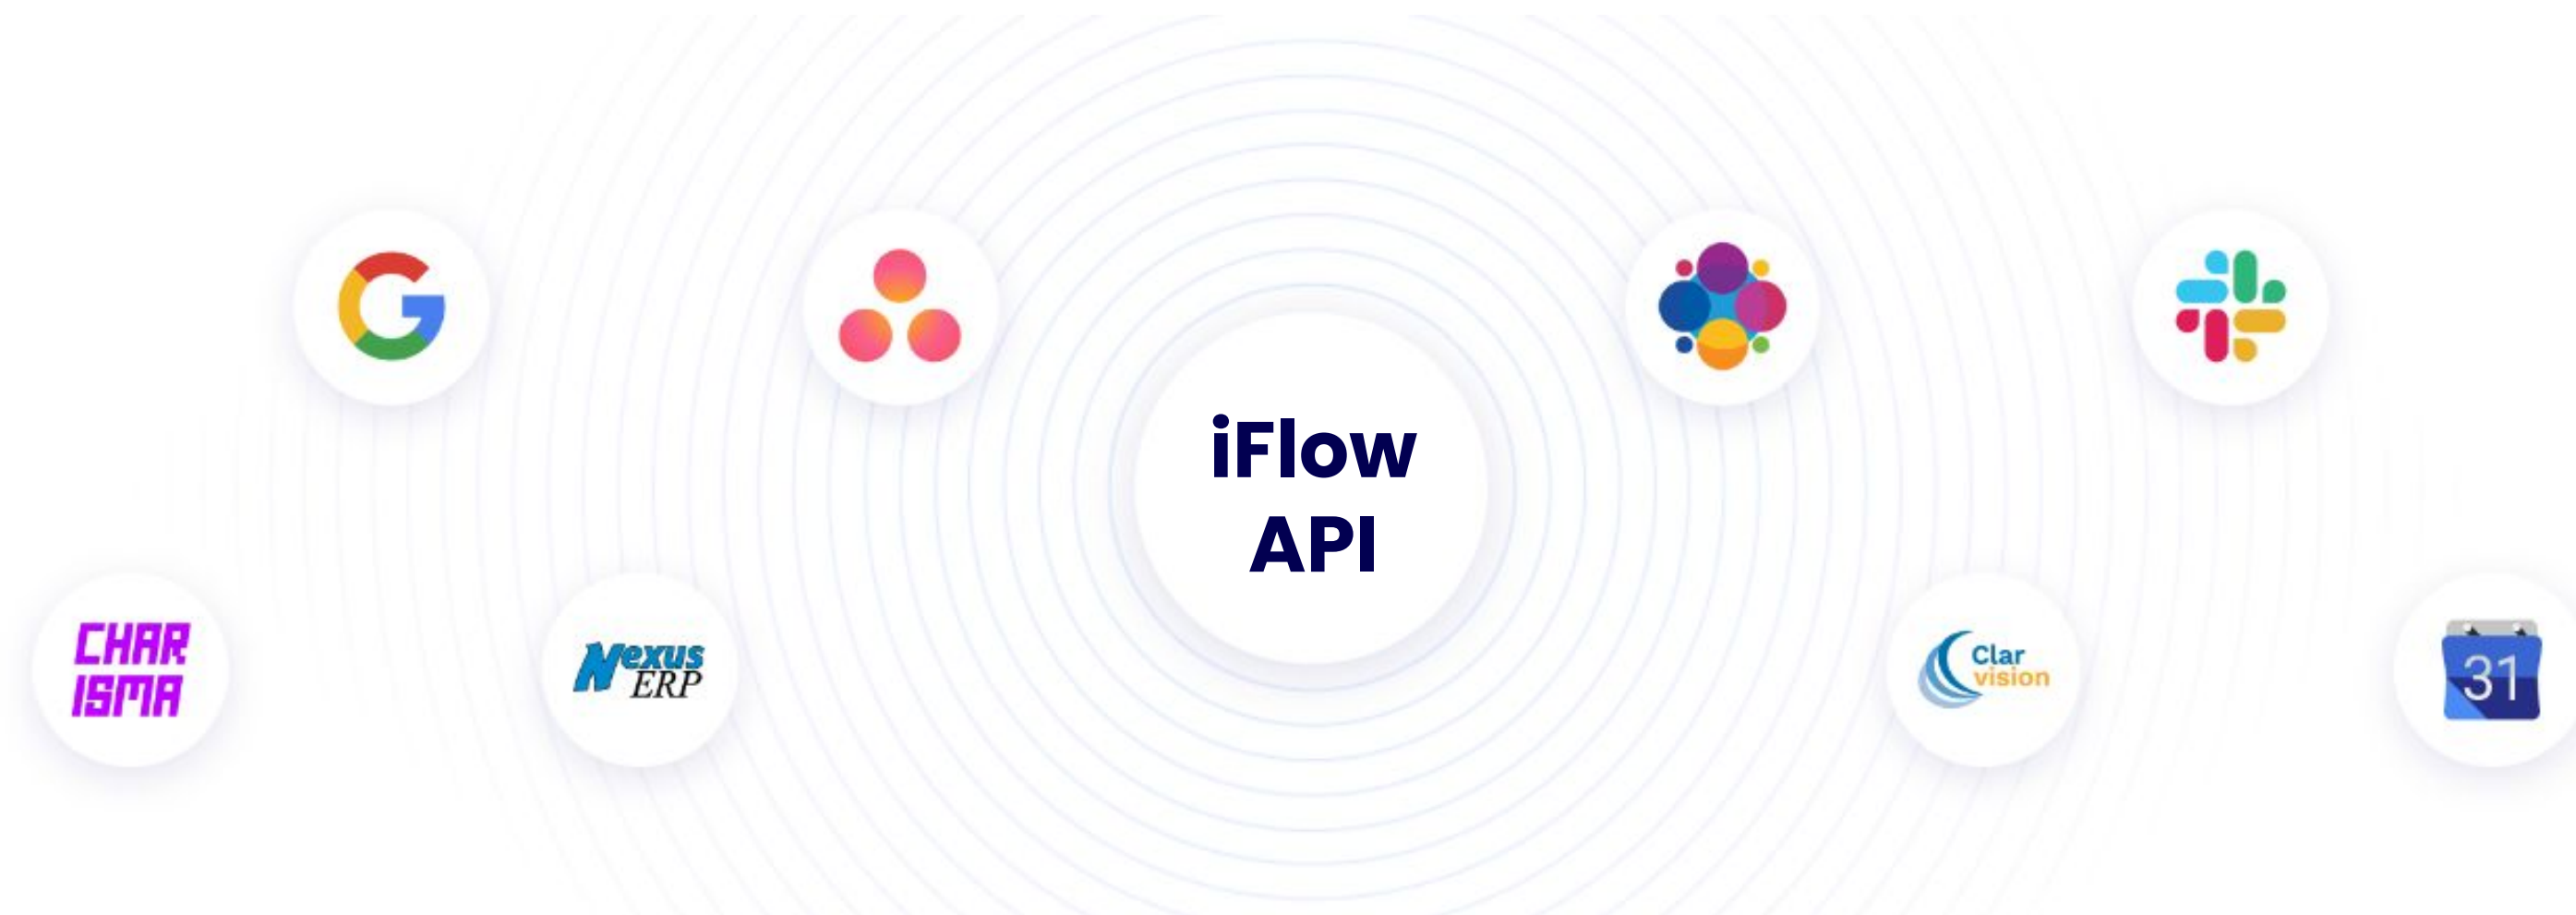

Thanks to Cloud technology, the iFlow app saves all your information daily without needing particular infrastructure (servers, routers, NAS, etc.)

Your IT staff doesn't have to worry about daily backups; you don't have to invest extra in other equipment!

Integrations with other apps

Based on needs, resources, or utility, any company that may want to process and transfer data from iFlow to another destination can do so via API key, for example:

- ✓ integration with timekeeping devices with access control
- ✓ integration with payroll software

Technical support

**You are guided through your iFlow
experience from the start**

**Our team is ready to assist you at all
times**

**All your questions about the app are
answered promptly**

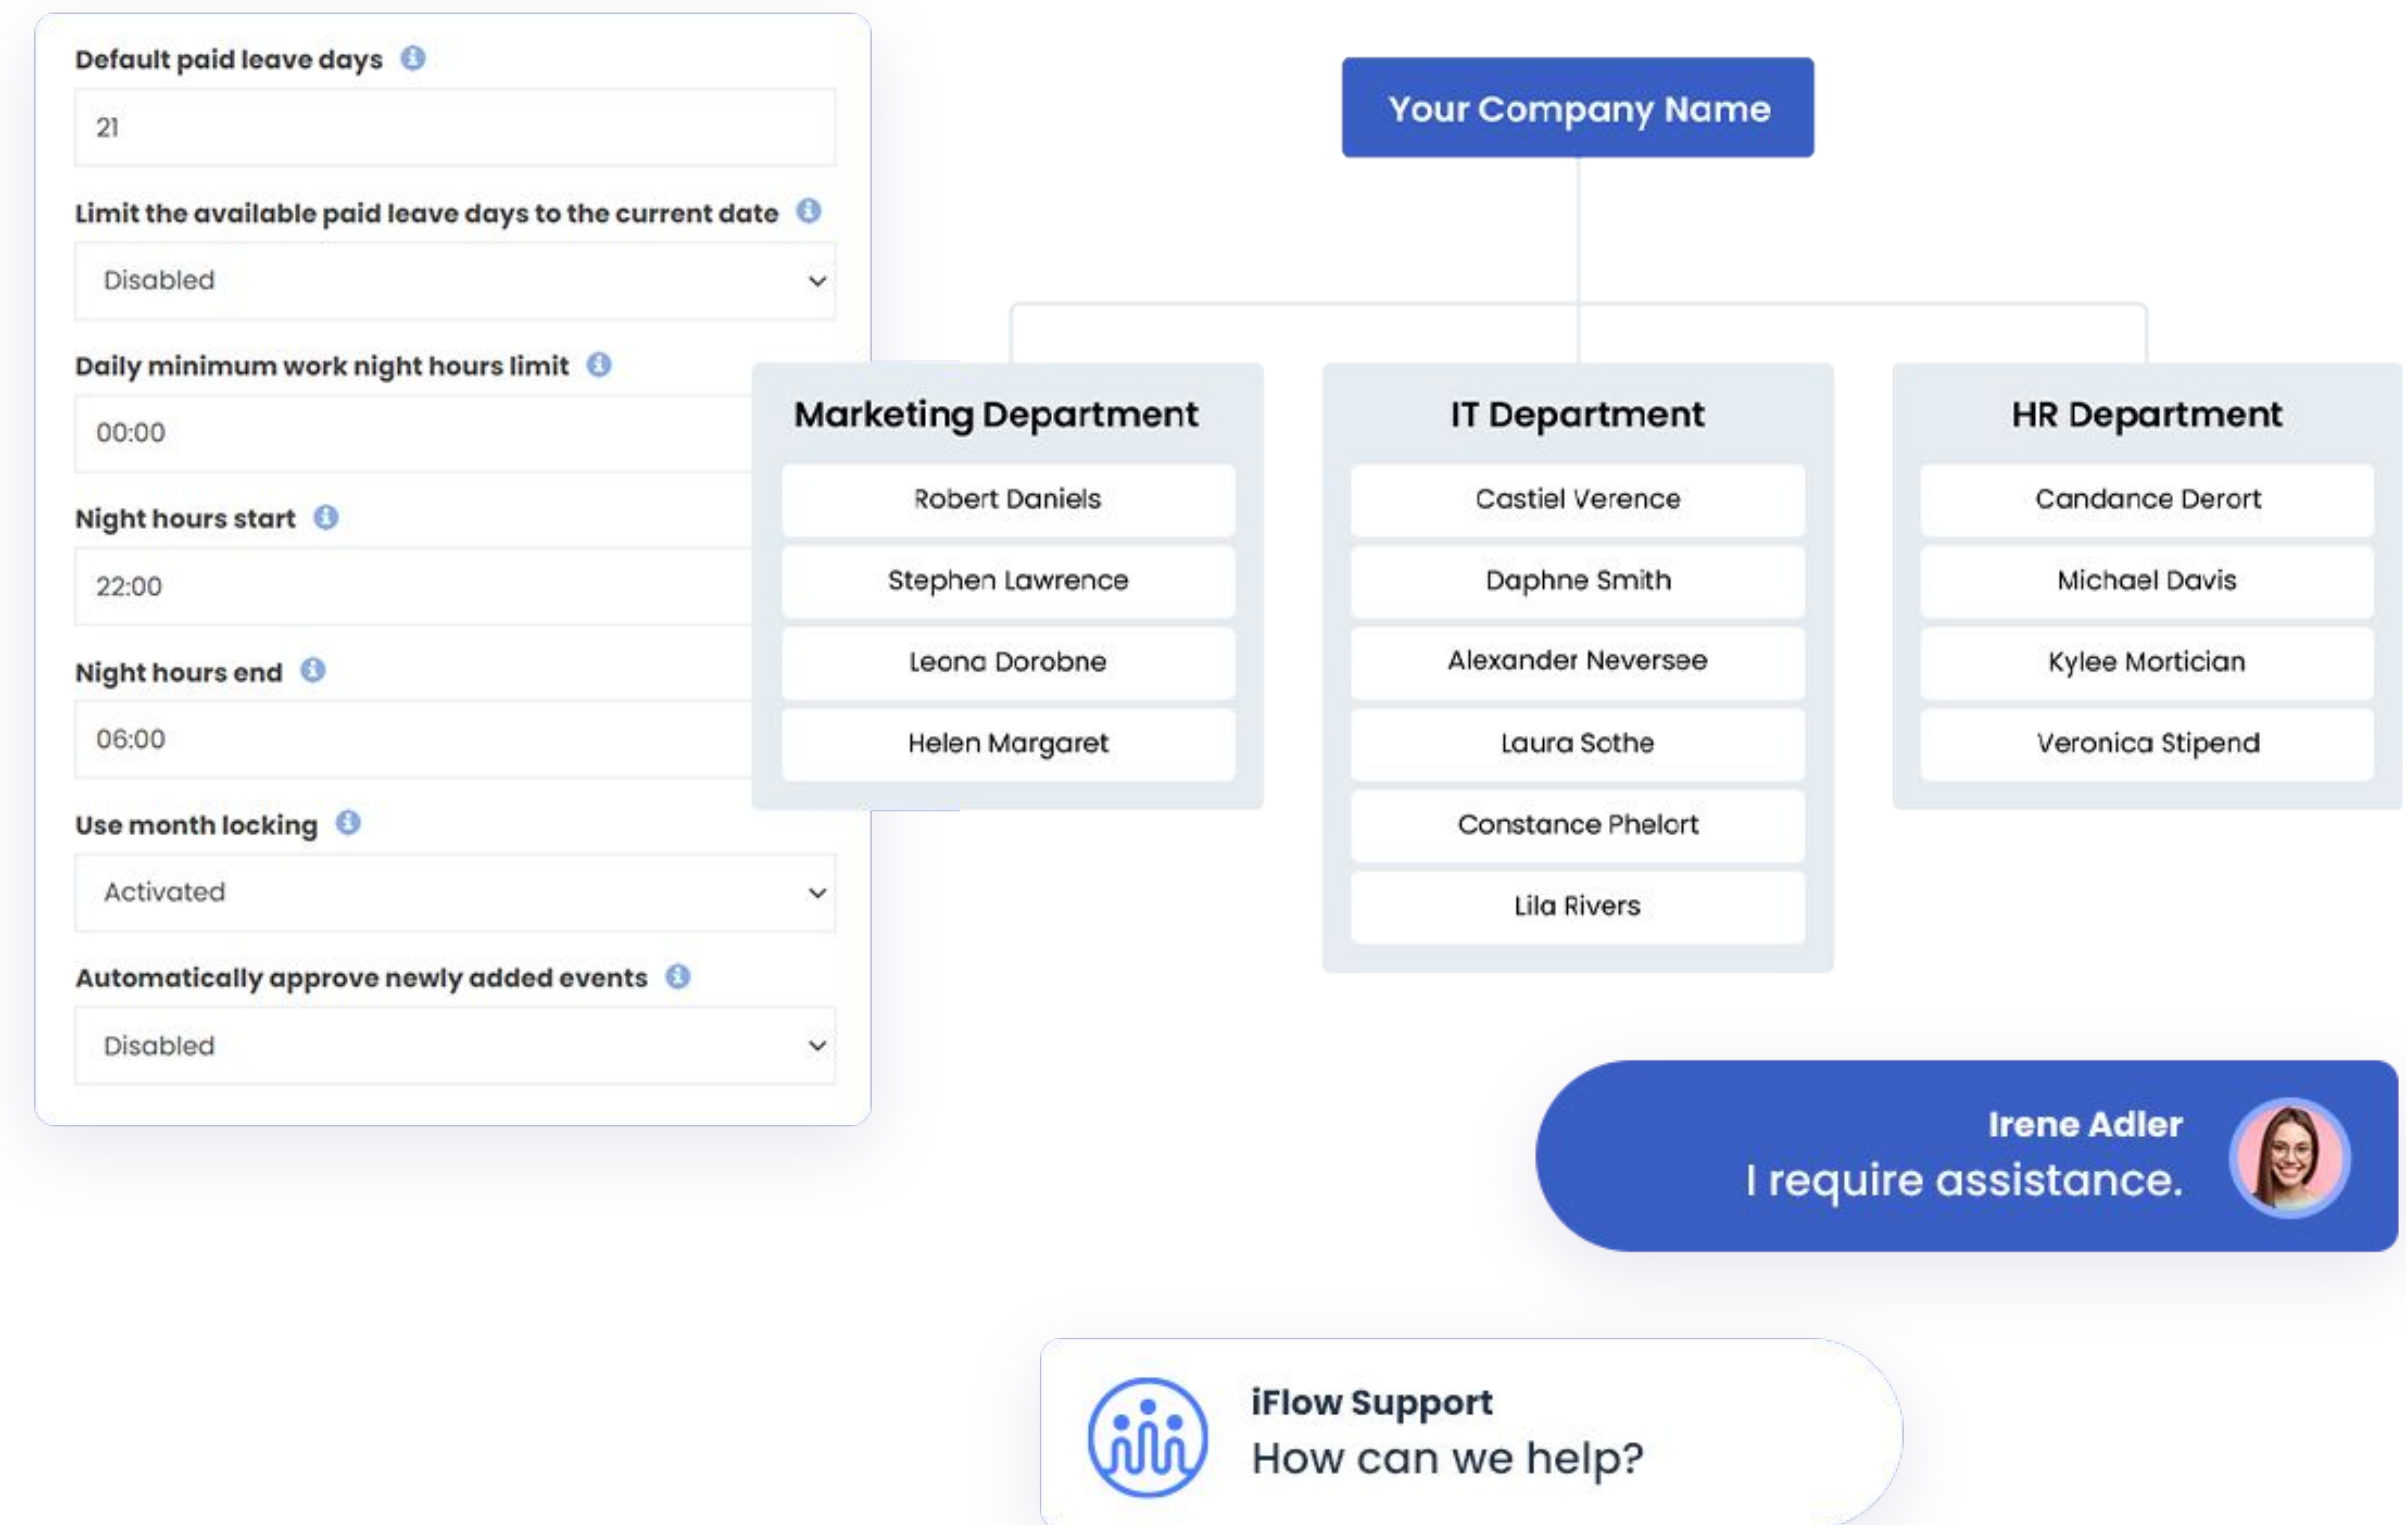

**You receive solutions in the shortest
possible time for any difficulty
encountered**

Account setup

For the most enjoyable experience with the iFlow app, our team will handle the account setup and set the necessary settings according to your company's requirements.

- ✓ **Importing employees into the system**
- ✓ **Creating the organization chart in iFlow**
- ✓ **The customer has the complete documentation**
- ✓ **Employees working in iFlow are available for technical support for any existing question**

Data security

- ✓ Strict policy for the protection of personal data
- ✓ The transfer of information is encrypted
- ✓ Employee data is not shared with anyone
- ✓ Anonymized database
- ✓ Employee access control in the iFlow system

Thank you for your interest in the iFlow app

I invite you to talk about your company's needs
and how iFlow can help you.
